

Introducing Sam

Sam is the symbol of construction activity at the Bob Hope Airport, first appearing for the Terminal Security Enhancement Project in 2003. Now he's back, and where you see Sam you'll find information on current and future projects. These efforts are intended to benefit you, our customer, through improved parking, ground access, and terminal facilities.

Terminal operations will continue as usual during construction projects. The construction will NOT affect flight arrivals and departures, so bear with us!
